WOOD CLEANER + BRIGHTENER & WOOD PROTECTOR

Easy To Use, Long Acting Wood Treatment System For Hardwood Decks

HOLMENKOL's wood maintenance products are a high-tech solution that keeps teak decks looking smart and in top condition. Consisting of a nano-based **CLEANER**, **BRIGHTENER** and **PROTECTOR** system that utilizes a two step process to remove all traces of dirt and grease, bring out the natural color of wood decks and insure a fully water-resistant, non-slip surface.

When applied the nano particles create a highly organized, uniform, multi-layered coating (100,000 nano particles are equal to the thickness of a sheet of paper) that is extremely durable and resistant to abrasion. The system also affords extended protection from moisture, salt, algae and moss while shielding surfaces from UV rays and other environmental hazards such that bleaching and drying are minimized.

Water based, acid free and formulated for new or older decks the **HOLMENKOL** care system is ideal for restoring and maintaining all wood surfaces.

Simple Upkeep, Great Results And Budget Friendly

- o **Versatile** - Formulated For Use On Teak Or Other Hardwoods
- o **Safe** - Does Not Affect Surrounding Surfaces Or Joint Sealants
- o **Simple** - Cleans And Brightens In One Operation
- o **Effective** - Provides A High Level Of Stain Resistance
- o **Long Lasting** - Creates A Durable And Very Wear Resistant Nano Barrier
- o **Water Based** - Environmentally Friendly

An Ideal Wood Restorer And Protector

PROTECTOR 25160 1000 ml

Application:

WOOD PROTECTOR For New Or Old Wood

1. Insure that decks have been cleaned with **WOOD CLEANER + BRIGHTENER**.
2. If wood is excessively weathered sanding followed by treatment with **WOOD CLEANER + BRIGHTENER** may be required.
3. Use a roller or brush to apply **WOOD PROTECTOR** to dry deck surfaces. Coverage should be approximately one half fluid ounce per square foot.
4. Remove excess from areas not being treated (gelcoat, etc.).
5. Allow to dry for at least 4 hours.
6. For first time applications a second treatment is recommended.
7. Clean tools with water or alcohol.

WOOD CLEANER + BRIGHTENER To Clean And Restore Weathered Wooden Decks

1. Add the contents of the **CLEANER** bag to 2.5 gallons of water and stir thoroughly.
2. Add the contents of the **BRIGHTENER** bag to the water / **CLEANER** mix and stir until all powders are fully dissolved.
3. Generously apply the blended mixture to decks with a sponge.
4. Allow to penetrate for at least 15 minutes.
5. Scrub the surface with a fine, short bristled brush insuring that the surface stays wetted at all times.
6. Repeat the scrubbing process until the brush rinses clean in water.
7. Thoroughly flush treated deck area with fresh water.
